I believe that my mother has in fact contacted your office, Sec of State and noted that my ex-wife intentionally withheld documents from me, so to force the situation present and to prevent me from a HAGUE CONVENTION claim.

You are also aware that this also comes back to current issues with the government, which are being fought over. I don't have any money for "court" intervention in the UK because hundreds of thousands of dollars were spent dealing with the government's need to cover up educational fraud, while abusing me, my family and now my son.

If anything can be understood at this point, is that my son is dead. He will never be my son or an American.
